

# Serialization, Aggregation and Track & Trace ("SATT") Platform for Pharmaceutical Companies

<https://www.satt.net>

## WHAT WE OFFER

SATT PLATFORM is an end-to-end, cloud-based solution that enables serialization, aggregation, and track & trace for pharmaceutical companies. It is fully adapted to the needs of:

- Marketing Authorization Holders ("MAHs")
- Single-site manufacturers ("SSM")
- Multinational pharma organizations ("MPOs")
- Parallel Distributors ("PD")
- Contract Manufacturing Organization ("CMOs")
- Third-party logistics ("3PLs")
- Wholesalers

The solution offers:

- Easy generation of serial and aggregation numbers
- Seamless data exchange
- Efficient management of production processes
- Secure connection to various external partners (e.g. MAH, CMO, Manufacturer, 3PLs, etc.)
- Bidirectional communication between internal production sites as well as with National and International Authorities
- Generation of all relevant external and internal reports

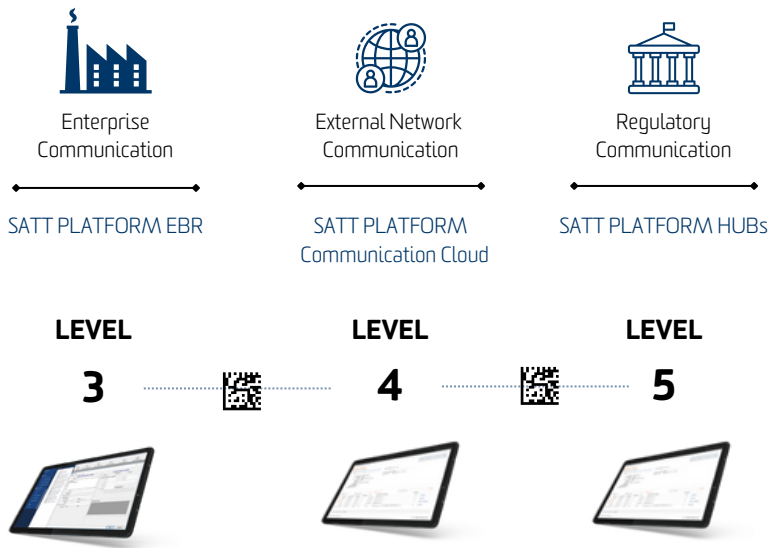

## CUSTOMER FEEDBACK

"SATT PLATFORM enables full traceability of each individual package, collective packages and pallets in supply chain. It is characterized by high level of reliability and business integrity."

Michal Wika, Manager Operations,  
Phytopharm Kleka

# END-TO-END TRACEABILITY THROUGH FULLY AUTOMATED SERIALIZATION AND AGGREGATION SOLUTION

## Serialization and aggregation data management

SATT PLATFORM provides efficient management of the serialization and aggregation production processes. It is an end-to-end solution for all production lines which generates automatic serialization and aggregation reports to the authorities.

## Supply chain visibility

The solution provides full visibility of the supply chain from the Marketing Authorization Holder through Contract Manufacturer, Parallel Distributor, and wholesaler to the distribution of the final product.

## Regulatory Compliance

SATT PLATFORM is an accredited software solution that addresses the compliance requirements for a wide array of partners. The solution is being regularly updated to reflect ongoing regulatory changes and aggregates all compliance related information in a glance.

## CONTACT US

Please contact us directly or visit [www.satt.net](http://www.satt.net) to learn more about SATT PLATFORM.

## KEY BENEFITS

### Exceptional flexibility and customization capacity

- Guaranteed uniqueness of serial and aggregation numbers besides the number of production lines and plants
- Multi-market compliance management capabilities
- Capacity for customization to any set of existing production processes
- Easy generation of highly customized reports in a variety of file formats
- Unlimited generation serial & aggregation numbers
- Process design without production distortions

### Effortless integration with third-party systems

- Automatic, semi-automatic, or manual fully secured data exchange with any external partners' systems
- Smart, customized internal and external reporting
- Complete adaptation of services to existing production processes
- Automatic connections to critical existing IT systems (e.g. ERP, WMS, etc.)

### Up to date with the latest regulatory changes - EU, USA, UAE

- Prompt reporting to the International Authorities, supporting all events and messages
- Capacity to establish connection any other regulatory system
- Stable connections without downtimes through regulatory updates
- Product Master Data Management
- Target Markets Management
- Wholesaler Management
- Product Pack Data Management
- Alert Management

### 24/7 support centre located in Europe

- Minimum response time on customer' request bases
- Extended Maintenance Services
- Two levels of Support
- No unexpected costs
